9 May 1950

TO: [REDACTED]

25X1A9a

FROM: RFB *AMB*

SUBJECT: Dissemination of ORE intelligence to
foreign governments, [REDACTED]

25X1X7

Reference: WAT-RFB conversation with [REDACTED] 25X1A9a

- 25X1A9a1. [REDACTED] talked to me this morning and said that situation in getting ORE intelligence to
25X1X7 [REDACTED] was laughable. Said that I&SS decisions were ridiculous.
- 25X1A9a 2. [REDACTED] believes that ORE should draw up policies and guidance governing dissemination to
25X1X7 [REDACTED] This would concern substance and discretion rather than security considerations. This agrees
25X1A9a with [REDACTED] appreciation of problem.
3. Now the rub. [REDACTED] believes that it is 25X1A9a S/PP function to recommend policies to AD/ORE and to administer program resulting when problems arise.
4. Don't know that I agree with his solution, but know that we must draw up policies governing ORE recommendations to DCI regarding dissemination to friendly foreign governments.
5. Problems involves material published by D/Pub, D/NIS, and D/Ma.
6. Should we consider S/PP, D/Pub, or S/Re for handling operations with S/PP drafting policies?
- 25X1A9a 7. Can Chief, S/PP or [REDACTED] find out 25X1A9a what [REDACTED] is thinking on this subject as his agenda says that they are studying the problem to make recommendations.
